FOR IMMEDIATE RELEASE

Roundabout Construction at N-10/N-40 in Kearney Area

Weather permitting, as part of the Phase III construction of the Kearney East Bypass, construction on the second phase of the roundabout at the intersection of N-10 and N-40 will start the week of July 11, according to the Nebraska Department of Roads.

During this phase of work, motorists will be shifted onto the new roundabout concrete pavement and temporary surfacing. During construction, 78th Street to the east side of the intersection will remain closed to traffic. Motorists can access Dawson Public Power's facility from the east on the newly constructed concrete pavement and access road. Local residents and farmers will have access maintained, from Avenue "N" west on the new concrete paved roadway.

This phase of the roundabout construction at the intersection is anticipated to be completed late this summer. Motorists, especially semis and vehicles pulling trailers, are encouraged to consider alternate routes during this phase of construction, as the roadway widths are narrow and turning radii are short.

The Department of Roads' project manager is Tom Farber of Kearney. Motorists are reminded to drive cautiously through construction work zones and to obey posted speed limits.
